

FootSteps to Transition

Transition Planning Workbook 4.0

The Maui “Talk Story” Edition

Youth: _____

‘Ohana Patrol: _____

Funded by the Health Resources and Services Administration Maternal and Child Health
Bureau grants D70MC04468, H6MMC20327, H84MC07999, & H84MC32515

Greetings Travelers!

Welcome to Transition 4.0! Much like the process of transition itself, our “workbook” must also grow up and present new knowledge. We’ve also expanded our ‘Ohana Patrol to others who have helped us make our own transition.

Family Health Services Division

What hasn’t changed is our essence, our workbook is meant to be a guide to help “talk story” and talk through the planning process of transitioning our youth to adult health.

As our mentor Josie Woll has always taught us, life is a journey, not an event. Transitioning to adulthood does not happen overnight. Successful transition requires time, patience, and a sense of humor.

We hope you will find these materials and our format helpful as you navigate through the complexities and the triumphs of Transition.

Aloha,

Leolinda Parlin

For Parents...

SKILLS

For youth...

The following is a short list of skills that young adults and or the people who care for them need.

Knows what health insurance is and how to use it	Understands diagnosis and impact on health
Understands the impact of aging on diagnosis	Able to tell someone about drug allergies and reactions
Able to identify medications and their purpose	Can identify pain on a scale of 1-10
Able to tell when something feels different	Knows who to contact in the event of emergency
Knows what to do when health is in danger	Able to tell the "danger signs" of the condition
Identifies personal health indicators and knows how to track them	Knows about the physical changes in becoming an adult
Understands the need to see doctors who care for adults	Able to schedule own doctor's appointment
Arranges transportation for appointments	Able to refill prescriptions and fill new ones

SKILLS

Knows what kind and when to take over the counter medicines	Has a method to remember when to take medications
Knows what vendors, pharmacies, or stores carry meds and supplies	Knows how to store supplies and care for equipment
Knows how to dispose of supplies	Knows specific situations to avoid for health reasons
Knows how often to see the dentist	Understands rights under the Americans with Disabilities Act (ADA)
Practices monthly self-examinations	Knows where to go in the event of an emergency
Prepares for first gynecological examination	Able to ask physicians questions
Able to use transportation to get around	Takes care of personal bathing needs
Takes care of personal toileting needs	Takes care of personal dressing needs
Prepares meals	Launders clothes
Has chores	Has hobbies or leisure activities

SKILLS

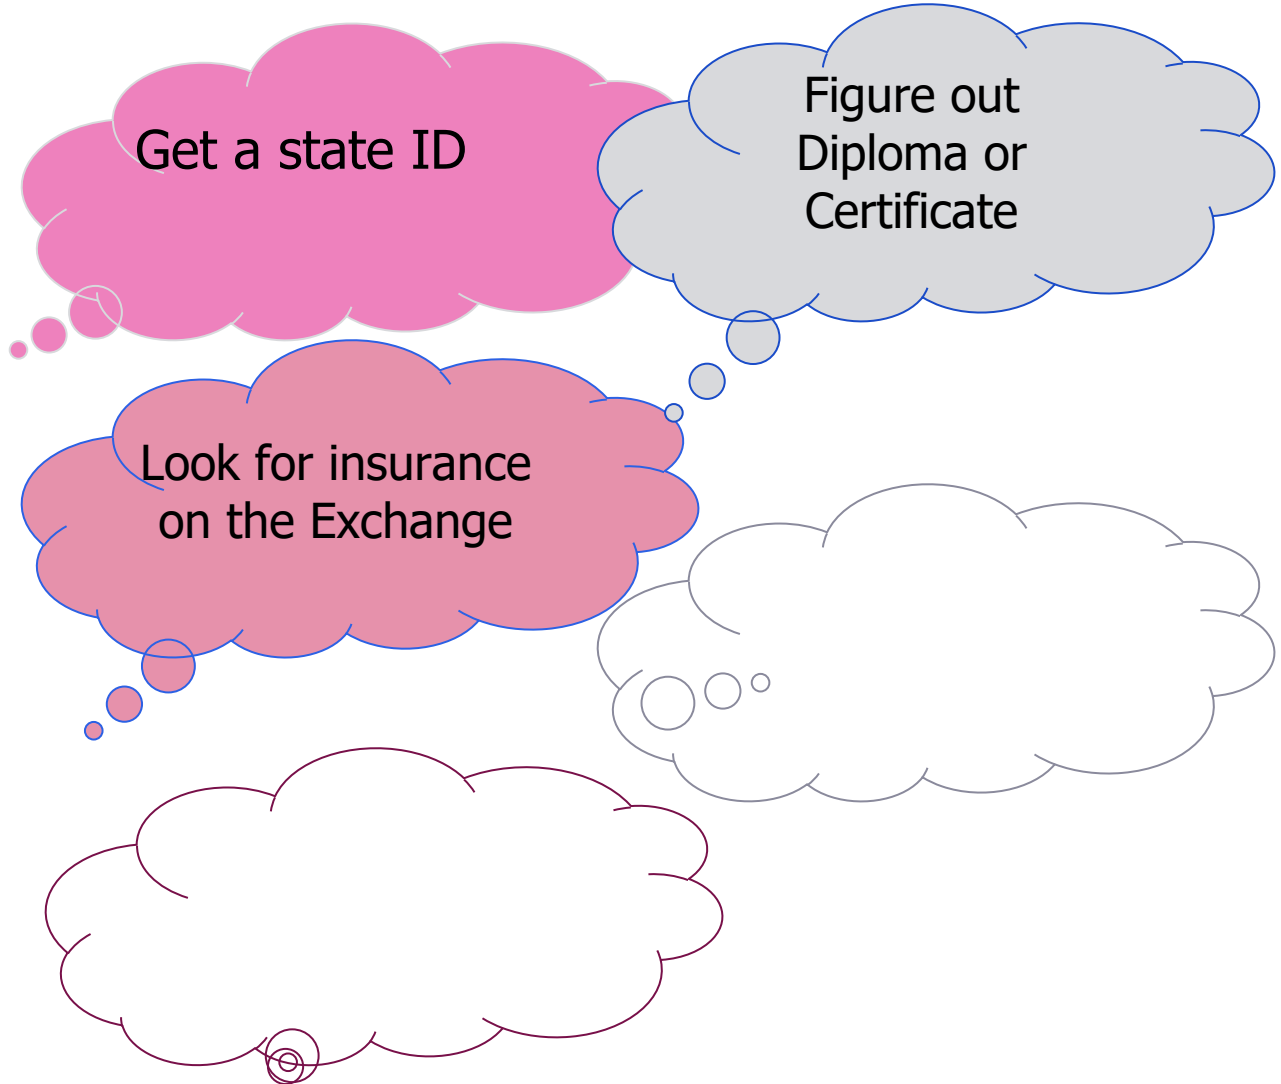

Has opportunities to volunteer	Budgets money
Maintains friendships	Has a communication system and uses it
Has reliable phone access	Identifies needs for work accommodations
Identifies needs for school accommodations	Aware of rights to community access under Americans with Disabilities Act (ADA)
Participates in a community recreational activity	Understands SSI work incentives
Requests copies of reports, plans, and other documents	

Consider incorporating these skills into home activities or service planning. Practice makes perfect!

Brief action PLANNING

Is there an activity you'd like to start in next week or two?
Please choose one cloud or fill in an empty one.

How confident am I in succeeding:

Bridging the Transitions of Children and Youth with Special Health Care Needs (CYSHCN) to Adult Life

Guiding Principles of the Hawai'i State Team

Family-centered care is the acknowledged best practice model for families who have children/youth with special health care needs. It requires a commitment driven by a collaborative partnership between the family and professionals which enables children/youth to assume increasing ownership of the decision making process. Therefore

- ❖ The transition process for children/youth with special health care needs and their family requires family-centered care which assures best practices, protocols and standards will achieve optimal outcomes including growth despite the difficulty inherent in any change.
- ❖ The transition of children/youth with special health care needs and their family requires a collaborative partnership between the family and the professionals involved.
- ❖ The transition activities for children/youth with special health care needs and their family begins with the initial referral and are on-going as needed or requested
- ❖ The transition of children/youth with special health care needs and their family requires the exchange of information and the transfer of those skills individually determined as appropriate
- ❖ The transition of children/youth with special health care needs and their family is one of shared responsibility between the family and professionals with varying degrees of accountability over time.
- ❖ The transitions of children/youth with special health care needs and their family should be successful and celebrated. *J. Woll 2005*
